Microsoft SQL Server 2005/2008 Query Optimization & Performance Tuning *(Pinal Dave—May 12-14, 2010)*

This intensive, 3-day course gives attendees an in-depth look at query optimization and performance tuning in SQL Server 2005 and 2008. Designed to prepare SQL Server developers and administrators for a transition to SQL Server 2005 or 2008, the course covers best practices for a variety of essential tasks for maximizing performance.

Day 1: Strengthening the Basics & SQL Server 2005/2008 Features

- Subqueries, Ranking Functions, Joins, and Set Operations
- Table Expressions
- TOP and APPLY

Day 2: Query Optimization & Performance Tuning, Part 1

- Logical Query Processing
- Query Tuning
- Introduction to the Query Processor

Day 3: Query Optimization & Performance Tuning, Part 2

- SQL Server Indexing and Index Maintenance
- Plan Guides, Query Hints, UDFs, and Computed Columns
- SQL Server Execution Plans

SharePoint 2010 *(Joy Rathnayake—May 10-11, 2010)*

This comprehensive 2-day workshop—featuring five hands-on labs—begins with an overview of the Microsoft SharePoint 2010 environment and its underlying components. Day 1 focuses on SharePoint for the ITPro, showing you how to create and extend SharePoint Web Applications, work with content databases, manage authentication, manage sites, and much more. Day 2, focusing on development on the SharePoint Server 2010 platform, discusses the various solutions and code modules that developers can use to enhance SharePoint's out-of-the-box functionality.

Day 1: SharePoint 2010 Introduction and ITPro Overview

- SharePoint 2010 Introduction and New Features
- Working with SharePoint Web Applications and Sites
- Hands-on Lab: Creating a New Web Application, Site Collections, Configuring Navigation, and More
- Understanding and Configuring Workflow Services, Search, and Disaster Recovery
- Hands-on Lab: Out-of-the-Box Workflows, Search & Indexing, and Backup & Restore
- Understanding SharePoint Designer 2010
- Hands-on Lab: Lists and Libraries, External Content Types, and Workflow Designer

Day 2: SharePoint 2010 Developer Overview

- Overview of SharePoint Development
- Developing Web Parts
- Hands-on Lab: Developing a Web Part using LINQ to SharePoint
- Understanding Business Connectivity Services (BCS)
- Hands-on Lab: Creating an External Content Type and Retrieving Data from SQL through BCS

Pinal Dave

Solid Quality Mentors' Pinal Dave is a Microsoft SQL Server MVP actively involved in community service in India through his technology blog and website, SQLAuthority.com. A proficient database architect, developer, administrator, and project manager specializing in SQL Server programming, Pinal is an expert in SQL Server 2008 and 2005 technologies. He holds a Master's of Science degree and a number of certifications, including MCDBA and MCAD (.NET). In addition to his 1200 SQL Server articles at SQLAuthority.com, Pinal is a regular columnist for several prominent IT websites and magazines. He currently leads the Gandhinagar and Ahmedabad SQL Server user groups and is a Regional Mentor for PASS Asia.

Other Courses Taught by Pinal

- Microsoft SQL Server 2005/2008 Query Optimization and Performance Tuning
- Advanced Performance Tuning for Experienced SQL Server DBA
- Database Maintenance from Performance to Disaster Recovery
- Advanced T-SQL for SQL Server 2005/2008
- T-SQL Optimization for SQL Server 2005/2008
- Designing for Performance Tuning for SQL Server
- Indexing for Performance Tuning for SQL Server 2005/2008
- Business Intelligence Training Roadshow

Joy Rathnayake

Joy Rathnayake, a Mentor for Solid Quality Mentors, has been developing applications using Microsoft .NET technologies since 2002 and has been architecting, designing, implementing, and developing portal solutions using SharePoint technologies since 2006. His experience spans a broad range of industrial sectors, including Airline, Training, and Telecom. He has been working closely with Microsoft Sri Lanka and Microsoft Learning Asia to bring the benefits of IT to every organization in the region. Joy is the only person in Sri Lanka to be recognized as both a Microsoft MVP and Microsoft Certified Trainer (MCT).

Other Courses Taught by Joy

- Microsoft SQL Server 2008 R2 Hands-on Labs
- Microsoft SharePoint 2010 Introduction for ITPros and Developers
- Microsoft SharePoint Server 2007 for Developers

"With his real-world experience in query tuning, Pinal uncovered some T-SQL query tuning myths that were very important and effective to know... With his excellent demos, he proved most of the tips to improve query performance were wrong. Thanks!"

"Pinal has extensive knowledge in his teaching materials and actual business implementation in real-life environments. The course is very interactive, which is a plus."

"I was delighted with Joy's presentation and technical skills."

"The training was very helpful. The way Joy involved all of us was really commendable... he made it really interesting."

About SolidQ India

Solid Quality India Pvt. Ltd. is the local venture of Solid Quality Mentors™ and Solid Quality Learning™ LLC to support the needs of India and surrounding markets, including Sri Lanka, Singapore, Nepal, and UAE. We are the trusted global provider of training and solutions for Microsoft SQL Server™ and the entire Microsoft Data Platform, specializing in advanced SQL Server training, consulting, and mentoring worldwide. Claiming the largest number of top experts on Microsoft's Data Platform, our team features more than 50 active or former Microsoft Most Valuable Professionals (MVPs) and Regional Directors (RDs).
